SHARVIX STUDIO

TRAINING PROGRAM · COURSE SYLLABUS

3-Month UI/UX Design Training Program

UI/UX design + Figma + basic HTML & responsive design — with a live project.

3 months	10 seats	Rs. 30,000	1 Nov 2026
12 weeks	per batch	complete fee	next batch

About the program

This hands-on program by Sharvix Studio teaches UI/UX design from scratch. You spend two months on design principles, UX research and Figma, then one month on basic HTML, CSS and responsive design so you can turn your designs into real web pages. You finish with a live project, a portfolio and a certificate.

What you get

- 12 weeks of live, mentor-led classes
- UI/UX design in Figma from scratch
- Basic HTML, CSS & responsive design
- Live design project with our team
- Weekly 1-on-1 mentorship & reviews
- Portfolio & case studies
- Interview prep & resume review
- Course certificate on completion

Who can join

College students, fresh graduates, career switchers and freelancers. No prior design or coding experience is needed — we start from the basics.

Tools & skills you will learn

Figma · UX research · Wireframing · Prototyping · Design systems · HTML5 · CSS3 · Responsive design

MONTH 1 — Design foundations

WEEK 1 — Introduction to UI/UX & design thinking

What UI/UX design is, the design process and how product teams work.

WEEK 2 — Design principles & typography

Hierarchy, alignment, contrast, fonts and readable layouts.

WEEK 3 — Colour, spacing & grids

Colour theory, spacing systems and layout grids.

WEEK 4 — UX research & user flows

Personas, journey maps, information architecture and user flows.

MONTH 2 — Figma & UI/UX design

WEEK 5 — Figma essentials

Frames, auto-layout, styles and your first screens in Figma.

WEEK 6 — Wireframes & prototypes

Low and high-fidelity wireframes and clickable prototypes.

WEEK 7 — Components & design systems

Reusable components, variants and a mini design system.

WEEK 8 — Website & mobile app UI

Designing complete landing pages and mobile app screens.

MONTH 3 — HTML, responsive & portfolio

WEEK 9 — Basic HTML5

Page structure, semantic tags, text, images, links and forms.

WEEK 10 — CSS3 basics

Colours, fonts, the box model, Flexbox and Grid basics.

WEEK 11 — Responsive design

Media queries and mobile-first layouts from a Figma design.

WEEK 12 — Live project, portfolio & certificate

Real project, case studies, interview prep and certificate.

Projects you will build

1

Responsive portfolio page

Design your portfolio in Figma and build it as a responsive HTML page.

2

Mobile app UI design

A complete mobile app in Figma — user flows, wireframes and final screens.

3

Live design project

A real UI/UX project with the Sharvix team, from research to final screens.
